## Model No.: L4-L

$0-10 \mathrm{~V}$ or 1-10V signal input/PWM Constant voltage output/Logarithmic dimming/Push Dim

Features
Fe CE RoHS emc LVD

- 4 channel 0/1-10V LED dimming driver with push-dim function.
- 4 channel 0/1-10V input, 4 channel PWM constant voltage output.
- 0~100\% dimming range via logarithmic characteristic can be very comfortable for human eyes.
- Compatible with active or passive 0-10V, 1-10V dimmer, can solve the fluorescent lamp dimming system compatible with LED lighting

## Technical Parameters

| Input and Output |  |
| :--- | :--- |
| Input voltage | $12-36 \mathrm{VDC}$ |
| Input current | 20.5 A |
| Output voltage | $12-36 \mathrm{VDC}$ |
| Output current | $4 \mathrm{CH}, 5 \mathrm{~A} / \mathrm{CH}$ |
| Output power | $4 \times 160-180 / \mathrm{W}$ |
| Output type | Constant voltage |

| Environment |  |
| :--- | :--- |
| Operation temperature | $\mathrm{Ta}:-30^{\circ} \mathrm{C} \sim+55^{\circ} \mathrm{C}$ |
| Case temperature (Max.) | $\mathrm{Tc}:+85^{\circ} \mathrm{C}$ |
| PPrating | $\mathbb{P} 20$ |

| Warranty and Protection |  |
| :--- | :--- |
| Warranty | 5 years |
| Protection | Reverse Polarity |

## Mechanical Structures and Installations

Wiring Diagram

0/1-10V dimmer $\times 4$

Push Switch

The provided Push-Dim interface allows for a simple dimming method using commercially available non-latching momentary) wall switchs.

- Short press:

Turn on or off all 4 channel light.

- Long press (1-6s):

Press and hold to step-less dimming, adjust 4 channel brightness at the same time.
With every other long press, the light level goes to the opposite direction.

## - Dimming memory

Light returns to the previous dimming level when switched off and on again, even at power failure

- Synchronization:

If more than one controller are connected to the same push switch, do a long press for more than 10 s ,
then the system is synchronized and all lights in the group dim up to $100 \%$.
This means there is no need for any additional synchrony wire in larger installations.
We recommend the number of controllers connected to a push switch does not exceed 50 pieces,
The maximum length of the wires from push to controller should be no more than 50 meters

Dimming Curve

Push dimming

0/1-10V dimming

$0 / 1-10 \mathrm{~V}(\mathrm{~V})$

Malfunctions Analysis \& Troubleshooting

| Malfunctions | Causes | Troubleshooting |
| :--- | :--- | :--- |
| No light | 1. No power. | 1. Check the power. |
|  | 2. Wrong connection or insecure. | 2. Check the connection. |
| Uneven intensity | 1. Output cable is too long. | 1. Reduce cable or loop supply. |
|  | 2. Wire diameter is too small. | 2. Change wider wire. |
| rear, with voltage drop | 3. Overload beyond power supply capability. | 3. Replace higher power supply. |
|  | 4. Overload beyond controller capability. | 4. Add power repeater. |
