Fade-in Fade-out Push+RF LED Dimmer

## Model No.: VI-F

5 fading speed/Step-less dimming/Push Dim/Wireless remote control/Multiple protection

## Features

- Fade-in Fade-out LED dimmer with smooth fading effect for soft start and stop.
- The fading speed can be set via knob potentiometer, 1S, 3S, 5S, 10S, 20S selectable.
- Connect with self-resetting metal button or push switch to achieve on/off and 0-100\% dimming function.

- Push input can accept either positive or negative trigger.
- Match with RF 2.4G single zone or multiple zone dimming remote control optional.
- Over-heat / Over-load / Short circuit protection, recover automatically.

Technical Parameters

| Input and Output |  | Dimming data |  | Safety and EMC |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Input voltage | 12-48VDC | Input signal | Push Dim + RF 2.4 GHz | EMC standard (EMC) | ETSI EN 301 489-1 V2.2.3 |
| Input current | 8A | Control distance | 30 m (Barrier-free space) |  | ETSI EN 301 489-17 V3.2.4 |
| Output voltage | 12-48VDC | Dimming gray scale | 4096 (2^12) levels | Safery standard(IVD) | EN 62368-1:2020+A11:2020 |
| Output current | $1 \mathrm{CH}, 8 \mathrm{~A}$ | Dimming range | 0-100\% | Radio Equipment(RED) | ETSI EN 300328 V2.2.2 |
| Output power | 96.384 W | Dimming curve | Logarithmic | Cerrification | CE,EMC,LVD, RED |
| Output type | Constant voltage | PWM Frequency | 2000 Hz (default) | Package |  |
| Environment |  | Warranty |  | Size | $\mathrm{L} 120 \times \mathrm{W} 43 \times \mathrm{H} 27 \mathrm{~mm}$ |
| Operation temperature | Ta: $-20^{\circ} \mathrm{C} \sim+55^{\circ} \mathrm{C}$ | Warranty | 5 years | Gross weight | 0.053 kg |
| Case temperature (Max.) | Ta: $+85^{\circ} \mathrm{C}$ |  |  |  |  |

Mechanical Structures and Installations

Light on/off fading speed
Rotate knob to switch fading speed,
When the fading speed set to $1 / 3 / 5 / 10 / 20$ s, the RUN LED indicator will flash $1 / 2 / 3 / 4 / 5$ times

Wiring Diagram

- Connect with self-resetting metal button, positive trigger input.

Press the button to switch or adjust brightness, the button indicator always lights up.

$\qquad$

- Connect with self-resetting metal button, positive trigger input.

Press the button to switch or adjust brightness, the button indicator lights up when pressed.

- Connect with self-latching metal button.

Press the button to power on or off the controller, the button indicator lights up when pressed. Use RF remote to adjust brightness optional.

- Connect with push switch panel, negative trigger input.

Press the panel to switch or adjust brightness.

## Match Remote Control

Match:
Switch off the power, then switch on power.
Immediately short press on/off key (single zone remote)or zone key (multiple zone remote) 3 times on the remote.
The light blinks 3 times means match is successful.
Delete:
Switch off the power, then switch on power
Immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 5 times on the remote.
The light blinks 5 times means all matched remotes were deleted.

## Push Dim Function

The provided Push-Dim interface allows for a simple dimming method using commercially available non-latching (momentary) wall switch or metal button.

## - Short press:

Turn on or off light.

- Long press (1-6s):

Press and hold to step-less dimming,
With every other long press, the light level goes to the opposite direction.

- Dimming memory:

Light returns to the previous dimming level when switched off and on again, even at power failure.

- Synchronization:

If more than one controller are connected to the same push switch, do a long press for more than 10 s, then the system is synchronized and all lights in the group dim up to 100\%.
This means there is no need for any additional synchrony wire in larger installations.
We recommend the number of controllers connected to a push switch does not exceed 25 pieces,
The maximum length of the wires from push to controller should be no more than 20 meters.

Dimming Curve
